File Edit View Search Project Build Debug Fortran wxSmith Tools Tools+ Plugins DoxyBlocks Settings Help
Start here x CODE LAB 02.c x
1 #include <stdio.h>
2 int main() {
3     int num;
4     printf("Enter an integer: ");
5     scanf("%d", &num);
6     if (num > 0){
7         printf("positive\n");
8     } else if (num < 0){
9         printf("Negative\n");
10    } else {
11        printf("Zero\n");
12    }
13    return 0;
14 }
15
```

```
"C:\Users\Asus\Documents\Ci x + v
Enter an integer: 5
positive
Process returned 0 (0x0) execution time : 7.031 s
Press any key to continue.
```

The image displays the Code::Blocks IDE interface. The top window shows a C++ source file named 'CODE LAB 02.c' with the following code:

```
3 int main() {
4     int studentID;
5
6     printf("Enter your Student ID: ");
7     scanf("%d", &studentID);
8
9     if (studentID % 2 == 0) {
10        printf("%d is Even\n", studentID);
11    } else {
12        printf("%d is Odd\n", studentID);
13    }
14
15    return 0;
16 }
17
```

The bottom window shows the terminal output of the program. It prompts the user to enter a student ID, and the user has entered 11. The program outputs "11 is Odd". The terminal also shows the process return code (0) and execution time (7.294 s).

```
Enter your Student ID: 11
11 is Odd

Process returned 0 (0x0)   execution time : 7.294 s
Press any key to continue.
```
